DETAILED ACTION

1. Applicants' response to the office action and the amendment filed on August 09, 2010 were considered and acknowledged.
2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. to ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Brian A. Fairchild on October 22, 2010.

Please cancel claims 10-13, 16-21.

3. The following is an examiner's statement of reasons for allowance:

Claims 1-9, 22-23 are allowed.

The present invention is drawn to a method for detecting the presence or absence of at least two variant nucleotides in a nucleic acid sample associated with thrombosis. The closest prior art (Reuber et al. in view of Pancoska) teach a method for detecting the variants of thrombosis, however the prior art did not teach or suggest a pair or a set of primers consisting of sequences selected from the group consisting of SEQ ID NOs. 1-12 in detecting the variants as presented in the instant amended claims. In view of the amendment of the instant claims, the present invention is novel and non-obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
